## Update on Smartphone Photography

*Tips, Tricks and More...*

In just a few years, smartphones have become an important part of our lives, providing lots of useful programs at our fingertips. Among the most interesting and rapidly developing is smartphone photography. Our Prez, Nyla James, has done a presentation on smartphone photography in the past, but it has been a while and nothing stands still in the digital world we live in. Nyla has been thinking that it is time for an update.

Fortunately, Nyla and Bob recently attended a major PSA conference, where class sessions on smartphone photography were a significant part of the agenda. Nyla learned a lot about new and interesting apps, techniques and supplemental gear and will be passing on this information to us at our **Program Meeting on Wednesday, November 4, 2015**. So, join her in exploring the latest, amazing, photo possibilities for these unique cameras.

Though not many of us have been doing so, we are permitted (and encouraged) to enter photos taken with smartphones in any category at our monthly competitions. So attend this update, experiment and enter some smartphone photos.

This presentation is an evening of "fun" picture taking. Don't toss your expensive, high-end camera. Just mentally add your smartphone to your photographic repertoire.

The best camera you own is the one you have with you, and this is the type of camera we have with us virtually all the time. *See y'all Wednesday!*

# Points North and East For November 2015 *by Jim Ogg*

Yosemite Valley Black Oaks could still be promising for early November. The Central Coast vineyards are turning and Central Coast Fall Color usually starts late in the month of October. I will be checking out Huasna, Adelaida, and the vineyards west and east of Paso Robles; western side of Salinas Valley in Monterey County, and the Edna Valley. The vineyard that was part of the Club's field trip last February, Pomar Junction Vineyard & Winery had started to turn by late October. Sealth Image SR173, "Vineyard's Fall", shows the Vineyards of Salinas Valley. Though not as famous as its sister area of Napa-Sonoma, they sometimes have very colorful fall colors. And when overlaid on the vine rows interesting patterns are sometimes seen.

Many of our beaches and dunes of the Central Coast are only accessible by humans during the period from October 1st to March 1st. The best opportunity for shooting on these beaches and dunes is early in the winter season; fewer footprints, more animal tracks and some undisturbed sand ripples can still be found. The three miles of the Sand (Dunes) Spit of Montana De Oro SP is especially productive and the Pismo Dunes Preserve and Oso Flaco Dunes should be checked out.

November is the start of daytime low tide access to the local beaches. Usually low tide occurs between noon and sunset and is often very low (minus) tides. This has the benefit that the tidal pools, coves and beaches are most accessible with fewest visitors. If it is not raining the beaches have comparable temperatures to summer with more sunlight and better sun lighting angles. Some early "winter" wildflowers may start blooming in the Beach Dunes, Sea Bluffs and Coastal Scrub plant zones. Montana De Oro SP, San Simeon Point, Elfin Forest Loop Trail, East-West Ranch Bluff Trail, Estero Bluffs SB, Morro Bay SP, Pismo Dunes Preserve, Oceano Dunes and Oso Flaco Dunes are places to look for low tide opportunities and/or "winter" coastal wildflowers.

Usually the first opportunity for the drenching rainfall Fungi seem to need is November. The Fungi then appear one-to-four weeks after. In 2005-06 we had a series of drenching rainfalls hence a great Fungi year. That year's Club trip to Cambria Cemetery succeeded in finding many Fungi including Bolettes, Fly Alaric, Chanterelles, Jack-in-the-Box, and Turkey Tail. Fungi can also be found at East-West Ranch, particularly the Southeast corner; San Simeon State Park; San Simeon Point; Stadium Park and Jim Green Trail in Atascadero; Los Osos Oaks Preserve, Eagle Rock Loop trail in El Chorro Park and Ferrini Ranch Open Space near SLO. If El Niño holds we may get comparable drenching rainfalls this season.

The Butterflies and Elephant Seals return to the Central Coast in November. The non-breeding Elephant Seals haul-out at Piedras Blancas early in November. The Bull Elephant Seals start arriving mid November. Soon after their arrival they contend for control of the beaches with often bloody fights.

## Vineyards Fall (SR173)

Although vineyards around Salinas Valley are not as famous as its sister area of Napa-Sonoma, they sometimes have very colorful fall colors. And when overlaid on the vine rows interesting patterns are sometimes seen.

The "Vineyards Fall" image is part of the Sealth body of work which are digital images of landscapes, scenics, and the human form and are based on locations in the Vineyards, Salinas Valley, Big Sur, Eastern Sierra, High Sierra and Central Coast of California.
